BETT EVENT
OLYMPIA

14th -17th January

BETT is the world's largest educational technology event.

BETT this year celebrates 25 years as the world's leading educational and information communications technology (ICT) event in 2009.

Dedicated to showcasing the best in UK and International educational technology products, resources and best practices

Through the years, it has enabled thousands of practitioners to enhance their knowledge of learning through technology.

Richmond Systems has continually supported the BETT Event and is dedicated to the delivery of best practice across all educational establishments.

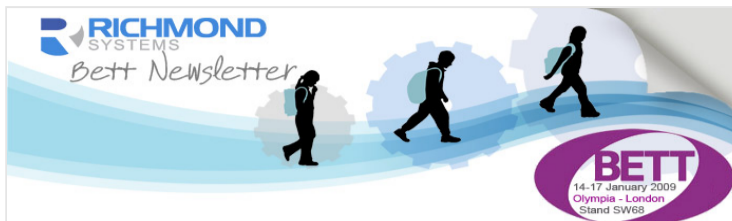

This year Richmond Systems celebrates its own 25 years in business. And joins the BETT event in celebrating its anniversary.

PRESS RELEASE

IT+E=C IT in Education =Compliance

Approaching the first major event of the New Year, the BETT Education Show at Olympia, the talk in the school yard is of compliance, as education develops a greater dependency on Information Communication Technology (ICT) to teach, plan and monitor lessons.

Eric Wright, Managing Director of Richmond Systems based in Surrey, gives his view:

"Schools nowadays must be able to support their increasingly techno-savvy ICT users whilst meeting their compliance requirements. It is simply not good enough to continue the traditional approach of using home-grown support systems based on old-fashioned databases and spreadsheets.

Just look at how computer literate a six year old is nowadays, and you can understand our position!

We have been servicing the specific needs of the education sector for many years, and firmly believe, that the use of customised service desk software, which is fully compliant, is the only way for schools to go in the future."

It is why our solutions combine the very best and up-to-date BECTA Best Practice Framework for ICT Technical Support (FITS)

FIVE KEY QUESTIONS YOU OR YOUR ADVISERS SHOULD ASK:

- | What will a system cost?
- | How soon will I see the benefits?
- | What will be the impact on IT staff & training?
- | Is FITS not over-complicated?
- | How long to implement?

- | Cost: Systems from £500.00
- | Benefits: Immediate via quicker and easier call logging and management
- | Training: No additional training is required
- | Complicated Not at all. FITS best practice is simplified by the Richmond Systems approach
- | Implementation Basic implementation in less than 1 day
